

Cubetape C200POS = Mobile Dimensioning and Scanning

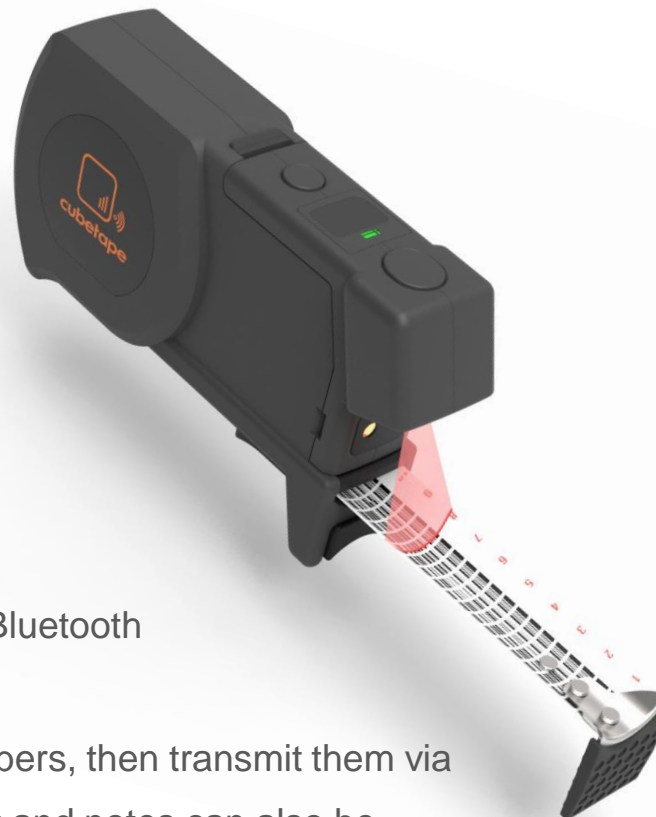

Cubetape C200POS is a tape measure, but it is much more!

Cubetape is a:

- **Tape Measure:** 2,4 – 4,8 and 7,3 m length options (July 2022)
- **Barcode Scanner:** 1D and 2D barcodes (July 2022)
- **Data Collector:** 1-3 barcodes and 3 dims L x W x H
- **Data Transmitter:** Bluetooth-enabled (Pro model also Wi Fi)
- **Micro-Processor:** Reads and interprets barcode commands
- **Modular Design:** Components easily replaceable
- **Rugged Device:** Readily handles rigors of a freight environment
- **Patented Product:** Protected by US Patent 11,156, 445
- **NMI approval:** For European Legal For Trade (Q4 – 22)

Cubetape readily integrates with a handheld device or workstation via Bluetooth as it emulates keyboard (manual entry) commands.

Cubetape allows the user to capture shipment dimensions and ref numbers, then transmit them via Bluetooth to your system. Via an optional handheld app, photos, weight and notes can also be captured and uploaded to the Cubetape Cloud database.

SPECIFICATIONS

Size/Weight

2,4 m – 312 gr

7,3 m – 510 gr

Recharge

2 - 3 hours

Duty Cycle

8 hours

Working Temp

-10° C ... + 40 ° C

Withstands

1,5 m drop on concrete

Tape

Barcode on top

Markings

Standard on backside of the tape

Cubetape = Mobile Dimensioning and Scanning

CubetapeC200POS:

- uses patented Barcode on Tape (BoT) technology to accurately measure any item up to 7,3 m in length.
- is mobile and allows users to measure items where they are encountered. No need to take items to a centralized location.
- is a barcode scanner. It saves time and improves productivity. It is easy to use and won't break the bank.
- eliminates transposition and data entry errors (faulty memory).
- integrates with any hardware device, and any software application.
- includes a wide range of configuration options and accessories.
- NMI version is certified Legal For Trade (LFT) for revenue purposes.
